

# Mixture Template

— template — description : A highly customizable flat template based on Bootstrap mixed up with DokuWiki's CSS placeholders. It offers different layouts or color schemes and uses Google Fonts.

 WORK IN PROGRESS  This template is functional but still in development process.

I wanted a modern template and started a conversion from a WordPress theme using Anika Henke's [guide](#) but found myself stuck between my own ideas and needs and the original theme that I didn't want to spoil... So I ended up starting a new template from scratch (at least from Starter template).

## Download and Install

Simply use the *Extension Manager* with the URL given above or download the said archive and unpack it into `.../lib/tpl/mixture` folder.

Refer to [template](#) on how to install and use templates in Dokuwiki.
